

Single L-Brace

Instructions

Part #: 1006662

Parts List			
ITEM	QTY	PART NUMBER	DESCRIPTION
1	1	--	Dock Frame
--	1	1006662	Single L Brace Kit
2	1	1002834	Channel 96.0 - Single L Brace
--	1	1004439	Bolt Bag Single L Brace
3	4	1001956	Bolt Carriage 3/8-16 x 1.0 SS 304
4	4	1001802	Nut Flange 3/8-16 Brass

Failure to follow instructions may result in personal injury and may invalidate the applicable warranty.

Assembly: To ensure the correct quantity of hardware in the right places, the Parallel L Brace Kit should be assembled at the same time as the dock frame and leg assembly. If it is not, you may have to disconnect some components to add hardware.

Step 1. Before attaching any parts together lay the dock frame upside down (to access the bottom) and slide all the 3/8 Carriage Bolts in the "T" Slot that are necessary for all the components that will be used (connector clips, support brackets etc.).

Step 2. Space the Support Channel approximately in the middle of the "L" frame. Because of the placement of the support bracket of the screw leg, this distance will vary slightly depending on which screw leg height is used.

Step 3. Attach the Support Channel to each Frame. Secure at each Side Rail with one 3/8 x 1.0 Carriage Bolt and one 3/8 Flange Nut - as show.
