Failure to follow instructions may result in personal injury and may invalidate the applicable warranty.

Step 1. Attach each Winch to one Leg Post Sleeve with one 3/8 x 3-3/4 Hex Bolt, one 3/8 Nyloc Nut, and one 3/8 Flat Washer on the top hole and one 3/8 x 1.0 Button Cap Screw, one 3/8 Nyloc Nut, and one 3/8 Flat Washer on the Bottom - as seen in Detail "A".

Step 2. Attach the Cable/Hook Assembly to the winch with the Cable Keeper.

Step 3. Attach the Winch Handle to the Winch with the nut and bracket already installed on the winch shaft.

Step 4. Slide the Dock Leveling Kit over the Leg Posts, attach the hook to the bottom of the dock frame, and tighten the Dock Leveling Kit winch just until the cable is snug.

Step 5. Loosen the set bolts on the dock leg/leg pocket. Raise or lower the winch until the dock is level and in the desired position.

Step 6. Retighten the set bolts and remove the the Dock Leveling Kit.
