

Single 12 Volt LED Flexible Canopy Light

Instructions

Part #: 1030246

Parts List	
Qty	Description
1	Power Cable
1	LED Light
15	Zip Ties

Step 1. Plug the 16ft cable into the canopy light power plug on the lift motor. Be sure that the red wire and black wire match sides on the plug as shown below on all connections.

Step 2. Plug in the LED light strip to the 16ft cable. Attach the LED light to the canopy frame using the provided cable ties.

Note: Use cable ties to secure any loose unused wire to prevent it from getting caught in any moving parts.

LED Light Kit Options
